Product Features

Our EMKA Compression Latch-Hinge is designed to meet the demands of the HVAC industry with features that provide ease of assembly, adjustability, pressure differential accommodation, and flexibility for the end user.

Ease of Assembly: Once assembled to the door the EMKA compression latch can be adjusted to properly mate to the cabinet by moving both vertically and horizontally.

Adjustability: After installation, the alignment of the latch can be adjusted to eliminate leaks.

Positive Pressure Relief: The latch will prevent the door from opening fully until pressure has been equalized.

Flexibility: The latch allows the door to be swung open both left or right or easily removed completely. Latches can be configured for a multitude of locks.
